EMPLOYMENT HISTORY

Parkview Health Fort Wayne, IN 11/2006 - Present
IS Analyst – Web Team

Design, develop, and support new or existing dynamic custom internal and external websites with ASP.Net, Access, SQL Server, and Windows Server for assisting people with document management, filling out forms, and presenting information from diverse sources in a unified way. Collaborated with Marketing on support and new requests due to graphic design background. Provided on call level of support due to Parkview being a 24/7 operation. Trained other employees on best practices for using Visual Studio and how to support existing web applications.

Drayton, Drayton & Lamar, Inc. Arlington, VA 2/2006 - 11/2006
Content Analyst

Retouched photographs and graphics, designed and developed Flash animations, and updated content on www.hud.gov and hudatwork.hud.gov as a contractor for the U.S. Department of Housing and Urban Development.

Designed and developed branding materials including logos, color schemes, templates for Microsoft Office, and business cards; designed brochures and a display to use with Job Fairs and Tradeshows using Photoshop and Illustrator for Drayton, Drayton & Lamar, Inc.

Verizon/Tek Systems Fort Wayne, IN 9/2005 – 1/2006
Website & Database Development Consulting

Design and develop dynamic custom websites with FrontPage, ASP.Net, Access, SQL Server, and Windows Server for assisting Utility workers with managing what tasks they need to accomplish out in the field, track hours spent for the current day, and predict future time needed so supervisors can accurately ascertain whether or not they need to keep employees in for overtime work for the current day or up to nine days in the future.

Nonik Technologies, Inc. Hillsdale, MI 12/2003 – 1/2005
Website & Database Developer

Design and develop static and dynamic websites using a combination of ASP.Net, SQL Server, and Windows Server for mostly mid-sized corporate clients, which include Bose Corporation; that needed a secure website to assist in managing company data. Developed solutions that feature standards compliant code to increase compatibility, efficient code to reduce bandwidth load on the client's network, templates to shrink time spent on initial development and future revisions, usable interface to avoid confusion in using the tool developed, and writing code in a secure matter to avoid exposure of sensitive data to unauthorized persons.
